for Planning and Evaluation**

**P. William Tillman, Jr.  
State Demographer**

"This publication is printed on permanent, acid-free paper in compliance with the General Statutes of the State of North Carolina"

*North Carolina Municipal Population, 1999* was published by the Office of State Budget, Planning, and Management. A total of 1,200 copies of this publication were printed at a cost of \$1,317.00 or \$1.10 per copy. Of these, 1,150 were printed for distribution by the Office of State Budget, Planning, and Management and 50 copies were printed for distribution by the Department of Commerce.

# 1999 POPULATION ESTIMATES FOR NORTH CAROLINA MUNICIPALITIES AND COUNTIES

This report presents estimates of the July 1, 1999 permanent resident population of North Carolina, each of its 100 counties, and each of its 542 active incorporated municipalities within boundaries as of July 1, 1999. For comparative purposes the April 1, 1990 and April 1, 1980 Census counts for each municipality (within boundaries as of January 1 of each respective year) and the percentage change in population during the estimate period (April 1, 1990 to July 1, 1999) are shown. In addition, the populations of all municipalities over 2,500 are listed, ranked by size. The municipalities with the largest percentage changes in population between April 1, 1990 and July 1, 1999 are presented in four size categories. The municipalities that have grown the most in population and in land area are listed for both the intercensal (1980 to 1990) and the estimate periods. For the largest 45 municipalities (at the 1990 Census), the growth during each of these two time periods in both population and land area is given, along with separate estimates for the growth due to annexations during the time period and for growth within the boundaries of the municipality at the beginning of the time period.

The state estimate was produced by making small adjustments to the 1999 state estimate for North Carolina produced in December of 1999 by the United States Bureau of the Census in cooperation with this office, the FSCPE (Federal State Cooperative Program for Population Estimates) estimate. Adjustments were made for corrections to major statewide institutional populations for April 1, 1990 and July 1, 1999. The county estimates are averages of two sets of estimates, a set of modified Census Bureau estimates and a set of ratio/correlation estimates produced by this office. The methods used in generating the county estimates are discussed in detail on the Demographics section of the Office of State Budget, Planning, and Management's Internet site ([www.ospl.state.nc.us/demog](http://www.ospl.state.nc.us/demog)) in "Methodology" under "Certified 1999", under "County Estimates".

Annual municipal population estimates are prepared by the Office of State Budget, Planning, and Management in two series: one for state and municipal planning purposes and a second for the distribution of state-shared revenues. The series presented in this publication is for planning purposes and estimates the population as of July 1, 1999 residing in municipal boundaries as of the same date. Because of specific legislation, municipal estimates for revenue sharing purposes must reflect the population as of July 1, 1999 residing in municipal boundaries as of July 1, 2000. This information is regularly supplied to municipal and county governments and is available upon request.

These municipal population estimates were developed from federal census counts as reported in the "1990 Census of Population and Housing, Summary Population and Housing Characteristics, North Carolina", 1990 CHP-1-35, U. S. Department of Commerce, Bureau of the Census, and corrections to these counts received from the U. S. Bureau of the Census between November of 1991 and September of 1996.

## ESTIMATING POPULATIONS FOR 1999

First, for each county, a set of 1999 non-group quarters initial population estimates was produced. Then, the set of initial estimates for each county was controlled to the 1999 non-group quarters population estimate for that county. Finally, a current group quarters population count was added to each estimate to produce the total population estimate for 1999.

The four basic methods considered in making the initial 1999 non-group quarters population estimate for each municipality and county balance were:

**METHOD I. CONSTANT PROPORTION.** This method assumes that the non-group quarters population of a municipality grows at the same rate as the non-group quarters population of the county in which it is located. The population of each individual area annexed from January 2, 1990 through July 1, 1999 is assumed to grow from its count date to July 1, 1999 at this same rate.

**METHOD II. PARTITIONED CHANGE.** This method assumes that areas more recently incorporated into the city limits of a municipality may grow at different rates from that of the core city. The non-institutional population of a municipality is divided into three geographical areas: the 1980 core city (areas enclosed by the 1980 corporate limits), the suburbs (all areas annexed between 1980 and 1990), and newly annexed areas (areas annexed between January 2, 1990 and July 1, 1999). The 1990 population of the suburbs is estimated by growing each area annexed between 1980 and 1990 from its count date to 1990 at a rate determined by its density. From the 1990 suburban population and the 1990 non-institutional population, the 1990 population of the core city is determined. The core city is assumed to grow from April 1, 1990 to July 1, 1999 at a rate that is a function of its 1980 to 1990 growth rate. The suburban area is grown from April 1990 to July 1999 at a rate which is a function of the growth rate of the core city, the growth rate of the county as a whole, the density of the suburban area, the density of the core city, and the density of the county as a whole. Each newly annexed area is grown from its count date to July 1, 1999 at a rate which is a function of the growth rate of the 1990 city (the core city plus the suburban area), the growth rate of the county as a whole, the density of the annexed area, the density of the 1990 city, and the density of the county as a whole.

### METHOD III.

**Section I --- VITAL RATES.** This section uses either reported or estimated natural increase and an estimate of migration to approximate the change in the non-group quarters population within the 1990 bounds of the municipality from 1990 to 1999. Natural increase data is available for all counties and for almost all larger municipalities (population 2,500 or greater). Natural increase for the non-urban portion of each county (smaller municipalities and unincorporated area) is allocated to each of the smaller municipalities and the unincorporated area based on relative population. Migration for the estimate period is estimated using April 1990 to July 1994 rates derived from Federal Income Tax return matching.

**Section II --- HOUSING UNITS.** This section assumes that the municipal share of the county non-group quarters population within the 1990 bounds of the municipality grows, from 1990 to 1999, at the same rate as the municipal share of the total number of county housing units. Housing unit growth is based on data for April 1990 and July 1999 from the Population Division of the U. S. Bureau of the Census, with adjustments by this office to remove units in areas annexed since 1990. For those municipalities where Census Bureau housing data is based on estimates, housing unit growth is calculated by proportionately distributing the remainder of the county housing unit growth, after the growth for areas for which there is data has been removed.

The results of **Section I** and **Section II** were weighted together to yield the 1999 non-group quarters population within the 1990 bounds for **Method III**. Since the migration data used in **Section I** was only for the 1st 4.25 year portion of the estimate period and the housing unit data used in **Section II** was for the entire 8.25 year period, the weight for the **VITAL RATES** Section was much less (20.00%) than that for the **HOUSING UNITS** Section (80.00%). The population of each individual area annexed from January 2, 1990 through July 1, 1999 is assumed to grow from its count date to July 1, 1999 at the rate computed for **Method II**.

**METHOD IV. AUTO/TRUCK REGISTRATIONS.** This method assumes that the municipal share of the county non-group quarters population grows at the same rate as the municipal share of the number of county automobile and truck registrations. For this year's estimates, the seven year changes in the auto and truck registration shares from January of 1990 to January of 1997 were linearly extended to cover 9.25 years and then used for the April 1, 1990 to July 1, 1999 estimate period. If the municipal share of the number of county automobile and truck registrations is constant, then this method reduces to **Method I**. The population of each individual area annexed from January 2, 1990 through July 1, 1999 is assumed to grow from its count date to July 1, 1999 at the rate computed for **Method I**.

For the vast majority of geographic units, the estimate was the unweighted average of the results of **Methods I, II, and III**. For 85 municipalities where the 1990 Census population was less than 50,000 and auto and truck registration data was available (the smallest 1990 Census population was over 2,300), the estimate was the unweighted average of **Methods II, III, and IV** (*i.e.*, **Method IV** replaced **Method I**). Thirteen areas with 1990 Census populations greater than 40,000 received special treatment, based on testing of the results of **Methods I** and **II** for these areas against the results of the 1990 Census. For each of these municipalities, **Method IV** was not used. For each of these municipalities, the weight of **Method III** was equal to 1/2 the sum of the weights for **Methods I & II**. For Fayetteville, Greensboro, and the Cumberland and Guilford County balances, **Method I** was not used. For Charlotte the ratio of the weight of **Method I** to the weight of **Method II** was 3/7; for Durham, 7/3; for High Point, 1/9; for Raleigh, 1/9; for Winston-Salem, 1/3; for the Mecklenburg County balance, 1/3; for the Durham County balance, 13/7; for the Wake County balance, 1/9; and for the Forsyth County balance, 1/3.

Thirty-five municipalities included within this report were incorporated after the January 1, 1990 federal census cut off date. For seven of these municipalities, separation counts were available for both the 1980 and 1990 Censuses; hence, these municipalities were treated just as if they had been incorporated before the 1990 Census. For the Towns of Marvin, Northwest, Sandyfield, Summerfield, and Wilson's Mills, and the Village of Flat Rock, a 1990 Census separation count was used to make the estimate. For the City of Trinity, the Towns of Grantsboro, Hemby Bridge, Mineral Springs, Oak Ridge, Peletier, Pleasant Garden, Sedalia, Swepsonville, Unionville, and Wentworth, and the Village of Wesley Chapel, an approximate 1990 Census separation count was used. This count was based on the assumption of uniform 1990 population density for Census blocks split by municipal boundaries. For the Town of Cedar Rock and the Village of Forest Hills, a special local census taken after 1990 was used to make the estimate. For the Towns of Bethania, Boardman, and Bogue, and the Villages of Chimney Rock and Lake Park, a 1990 Census separation count and a special local census taken after 1990 were used to make the estimate. For the Town of Carolina Shores, which formed from an area originally annexed into Calabash in 1989, special data from that annexation was used in making the estimate. For the Towns of St. James and Bermuda Run, the estimates were based on 1990 Census data and 1999 data supplied by the respective county governments.

On July 1, 1995, the Town of Hazelwood was merged into the Town of Waynesville. On July 1, 1996, the Town of Battleboro was merged into the City of Rocky Mount. On September 18, 1998, the new Town of Carolina Shores was formed from a portion of the previously defined Town of Calabash. On July 1, 1999, the Town of Alexander Mills was merged into the Town of Forest City. Also on July 1, 1999, the Towns of Yaupon Beach and Long Beach were merged to form the Town of Oak Island.

In addition, local special censuses were incorporated into the estimates for the Towns of Bald Head Island, Caswell Beach, Dillsboro, Hoffman, Momeyer, Tobaccoville, and Whitsett. Federal special censuses were incorporated into the estimates for the Towns of Banner Elk, Cary, Cornelius, Hillsborough, Holly Springs, Huntersville, and Mooresville. Two federal special censuses since 1990 were used for the Towns of Cary, Cornelius, and Holly Springs.

In 1998, for the first time since production of population estimates for North Carolina municipalities was begun in the early 1970s, a special federal census was done for an entire county, with separate results for each municipality in the county and the unincorporated area. The Pitt County Estimate and the estimates for the City of Greenville, the Towns of Ayden, Bethel, Falkland, Farmville, Fountain, Grimesland, and Winterville, the Village of Simpson, The Pitt County portion of the Town of Grifton, and the unincorporated area of Pitt County were all based on the results of this special census.

## DATA USER NOTES

The 1998 municipal estimates released last year should not be compared with these estimates for two major reasons. The first is that the post-1990-Census housing unit changes for a few of the larger cities (including Charlotte and Wilmington) were based this year for the first time on actual building permit data. The second is that, for this year's estimates, a new method was used to estimate housing unit changes for municipalities for which there is still no actual data. To obtain the best estimates of population change over time, one should compare these estimates only with the 1980 and the current 1990 Census counts. For more information, contact Mr. P. William Tillman, Jr., North Carolina Office of State Budget, Planning, and Management at (919)733-4131.

## Footnotes for Table 1

<sup>1</sup>This municipality has incorporated or reactivated between the 1980 and the 1990 Censuses. The 1980 figure shown is a separation count derived after incorporation and is not published in the 1980 Census reports.

<sup>2</sup>This municipality annexed into this county after the 1980 Census.

<sup>3</sup>This municipality has incorporated since the 1990 Census. The figures shown for 1980 and 1990 are Census separation counts derived after incorporation and are not published in the 1980 or the 1990 Census reports.

<sup>4</sup>This municipality has incorporated since the 1990 Census. The figure shown for 1990 is a Census separation count derived after incorporation and is not published in the 1990 Census reports.

<sup>5</sup>This municipality has incorporated since the 1990 Census. The figure shown for 1990 is an approximate Census separation count based on the assumption of uniform population density for 1990 Census blocks split by a municipal boundary. This value was derived after incorporation and is not published in the 1990 Census reports.

<sup>6</sup>One or two special censuses conducted after 1990 were used in determining this estimate.

<sup>7</sup>This municipality annexed into this county after the 1990 Census.

<sup>8</sup>The Town of Hazelwood merged with the Town of Waynesville on July 1, 1995. The new municipality is the Town of Waynesville. Figures shown for 1980 and 1990 are sums of the values shown for the two towns in 1980 and 1990 Census reports.

<sup>9</sup>The Town of Battleboro merged with the City of Rocky Mount on July 1, 1996. The new municipality is the City of Rocky Mount. Figures shown for 1980 and 1990 are sums of the values shown for the two towns in 1980 and 1990 Census reports.

<sup>10</sup>The Town of Carolina Shores was formed from a large section of the Town of Calabash on September 18, 1998. This area was not part of the Town of Calabash in 1980. The division of the 1990 Census count for the old Town of Calabash into a value for the new Town of Carolina Shores and a value for the new Town of Calabash was estimated by this office.

<sup>11</sup>The Towns of Long Beach and Yaupon Beach merged on July 1, 1999 to form the Town of Oak Island. Figures shown for 1980 and 1990 are sums of the values shown for the two towns in 1980 and 1990 Census reports.

<sup>12</sup>The Town of Alexander Mills merged with the Town of Forest City on July 1, 1999. The new municipality is the Town of Forest City. Figures shown for 1980 and 1990 are sums of the values shown for the two towns in 1980 and 1990 Census reports.

<sup>13</sup>A special technique using 1990 Census data and current housing data was used to make this estimate.

<sup>14</sup>The 1990 value shown for this municipality was estimated by this office.

..... Official Census population data is unavailable.
